PROFILE

I am a web developer, with extensive experience in the media production industry. My ability to communicate effectively allows me to help others bring their creative vision to life.

I create responsive, accessible and visually cohesive web applications utilizing advanced skills in HTML, (S)CSS, JavaScript, and React. My proficiency in C and Python gives me a strong base in fundamental programming concepts.

PROJECTS

Keanu and Who?

[Live](#) | [GitHub](#)

- Search for any two actors to check if they have ever acted together
- Used React and TMDB API to compare movie credits of both actors.

Friendly Weather App

[Live](#) | [GitHub](#)

- View current weather and forecast at the user's geolocation.
- Used Vanilla JS and FETCH to combine data from freegeoip.app and OpenWeather API to return results in a responsive and dynamic app.

Let's Get Cooking!

[Live](#) | [GitHub](#)

- Search for recipes using ingredients that you have in your pantry
- Uses jQuery and AJAX to get data from the Spoonacular API.

Credit Card Checker

[Live](#) | [GitHub](#)

- Check the validity of a credit card number and the type of card.
- Uses jQuery & nested conditionals to check Luhn's algorithm.
