- Excellent team-player
- Natural leader and motivator
- Self-driven and independent
- Flexible and adaptable
- Receptive and open to all perspectives

HONORS & AWARDS

Canadian House of Commons Certificate of Appreciation (2016)
Recognizing work as Cinematographer on documentary 'Maple Morning' and contribution to Canadian cinema.

I create responsive, accessible and visually cohesive web applications utilizing advanced front-end skills and strong programming fundamentals. My ability to communicate effectively allows me to help others bring their creative vision to life. In nearly a decade as a videographer, I have built expertise in holistically understanding any project brief before meticulously completing all the tasks required.

PROJECTS

Keanu and Who?   Live | GitHub
- Search for any two actors to check if they have ever acted together
- Used React and TMDB API to compare movie credits of both actors.

Let's Get Cooking!   Live | GitHub
- Search for recipes using ingredients that you have in your pantry
- Used jQuery and AJAX to get data from the Spoonacular API.

The Film Factory   Live | GitHub
- Search for an English film to see foreign-language recommendations
- Used data from TMDB API and processed results using React hooks.

EDUCATION

Juno College of Technology
